This business  
definitely gets  
a BIG thumbs  
up!

## Specialist Manufacturer. VERY Profitable!

Are you serious about buying a seriously good business?

\*Producing a cash surplus of approx. \$650,000 PA!

Along with excellent sales & profits, this business boasts many other great attributes, including; a niche market supplier, good cash flow & high margins, a great reputation, long established & stable.

Investing in technology has given this business an advantage over competitors which has allowed them to thrive. High tech equipment which is excellently maintained, along with efficient & effective process systems & procedures ensure continuous high volume output & quality. The investment in technology also creates real barriers to entry for anyone wanting to compete.

The market continues to evolve with requirements for new designs / products coming in on a regular basis - the future looks very positive. The customer base is vast & spread throughout a variety of industries. Comprehensive records of customer's transactions, requirements & details are available. The business is currently located in Auckland; however it could be relocated if that was your plan.

A well organised, competent & qualified staff structure is in place, which enables the vendor to take leave away from the business when required. The business could be managed or run by people from diverse backgrounds, as no specific industry qualifications are required. Being able to understand manufacturing processes, being good with people & being dedicated to meeting deadlines & standards would be great attributes.

Confidentiality is very important to this vendor so it is likely that I will need to meet you face to face before passing on detailed information.
